AUREON TECHNOLOGIES

Official Brand Guidelines & Governance Policy (2026)

Confidential & Proprietary • Version 2.4 • Effective Q1 2026

1. Brand Voice & Editorial Tone

Aureon's voice is authoritative, precise, confident, and evidence-grounded. We communicate complex AI and fraud security architecture with clarity. We never use aggressive, predatory, or hyper-sensationalist language. All performance assertions must cite verified benchmarks.

2. Prohibited Guarantees & Superlatives (RULE-031 & RULE-017)

• PROHIBITED ABSOLUTES: Content creators, agencies, and partners must NEVER promise '100% protection', 'guaranteed safety', 'zero risk', or 'bulletproof security'. Security is probabilistic.
• PROHIBITED SUPERLATIVES: Claims such as 'India's #1 fraud platform', 'world's best', or 'market leader' are strictly forbidden unless verified by third-party analyst audit (Gartner/Forrester) with formal attribution.

3. Controlled Terminology (TERM-001 - TERM-005)

• Use 'Fraud Prevention Platform' instead of 'Fraud Protection Platform'.
• Refer to our core intelligence engine as 'Aureon Shield™', never 'the Aureon software' or 'the bot'.
• Use 'Autonomous Threat Defense' instead of 'Automated Blocking'.

4. Approved Organizational Facts (FACT-042 & FACT-089)

• Fraud Reduction Benchmark: Aureon Shield achieves up to 42.0% enterprise fraud loss reduction (measured across 18 enterprise banking partners in 2025). Do not state 73% or 80%.
• Latency Benchmark: Sub-12ms decision response time.
• Transaction Coverage: Audited across 500M+ real-time transactions in APAC region.

5. Visual Identity, Color System & Logos

• Primary Brand Color: Aureon Deep Navy (#0F172A).
• Accent Signal Color: Aureon Cyan (#0EA5E9).
• Background Contrast: Ensure minimum 4.5:1 WCAG AA contrast ratio for all textual overlays on visual assets.
• Logo Isolation: Maintain 24px clear space around the Aureon wordmark on all social and banner creatives.
